

HOW TO MEASURE A ROOM

Length

Width

Measure the longest length and widest point of each room, including closets. Add up every room, then add 10% overall for cuts and waste.

Repeat for each room

Room-by-room measurements

TOTAL square footage, all rooms combined

Add 10% for cuts and waste

_____ sq ft

Note: color-matched transitions, stair nose, and quarter round are only available for Resolve flooring — see the separate Resolve Stairs & Transitions Worksheet if that applies to your project.

Sketch & notes

Draw a rough floor plan — label each room and mark doorways between them.

Notes for your shopping consult (style, colors, must-haves, questions)

Send this worksheet to Liz for help finding exactly what you need
